

# Icons Built for Clarity and State

- Distinct shapes for statefulness
- Icons with text labels added clarity
- Less dependence on color

## Navigation Icons

# Colors Tuned for the TV

Built a color palette grounded in industry standards, tuned for TV-safe ranges and AAA WCAG contrast across devices

Understanding [SC 1.4.6](#):

## Contrast (Enhanced) (Level AAA)

### In Brief

- Goal**  
Text can be seen by people who need strong contrast.
- What to do**  
Strongly contrast text against its background.
- Why it's important**  
Some people cannot read text with minimum contrast.

### Success Criterion (SC)

The visual presentation of [text](#) and [images of text](#) has a **contrast ratio of at least 7:1**, except for the following:

#### Large Text

[Large-scale](#) text and images of large-scale text have a contrast ratio of at least 4.5:1;
