

Usability Findings

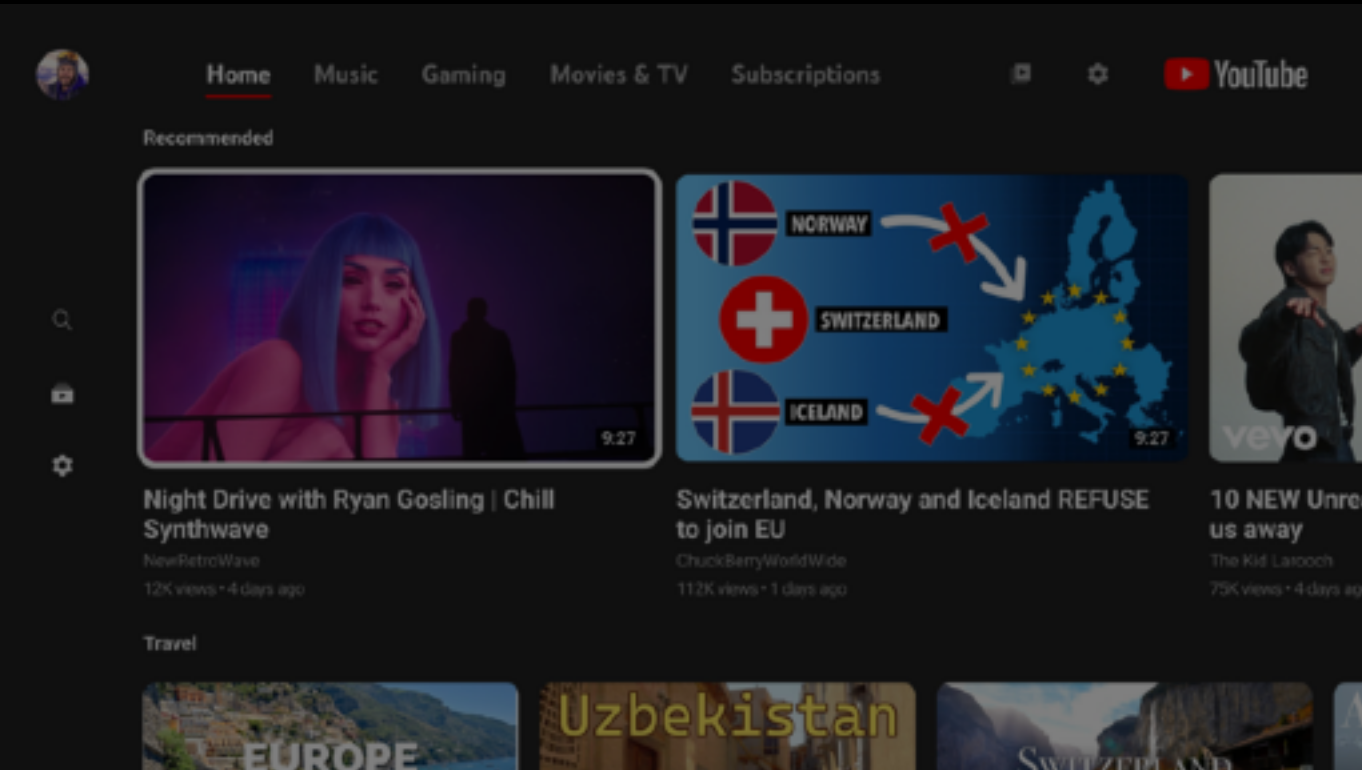

Top Nav

- + Topics always visible
- + Seeing more content is helpful
- Challenges with additional content categories and translations

Left Nav

- + Quick access to entire nav (press left)
- + Clear sign-in status, especially when open
- + Easy to go deep, or change context
- Topics hidden, icons unclear when closed

Hybrid

- + Quick access to search/library
- + Clear sign-in status, especially when open
- Hard to find "My stuff" (e.g. "Library")
- Sense of feeling "lost" when in subpages

Insights & Principles

Help users find, not wander.

Great navigation builds momentum—every click should feel like progress, not guesswork.

Respect the physicality of the remote

With X/Y navigation, assign one axis for depth and one for changing context—never both.

Lead with Content

Minimize the UI footprint so content remains the focal point.

Surface Identity Clearly

Make sign-in obvious, persistent and reinforce with clear straightforward language
